## A childcare assistant to support children in nursery

Life on the streets is dirty, dangerous and short. It's no place for a young child.

Our nurseries in Ghana provide safety and food, as well as supporting the early development of these young children helping them to escape their chaotic upbringing. A childcare assistant can give these young children the support they need to have the best possible start in life.

# Chance for Childhood

At Chance for Childhood we believe that no child should be forgotten! That's why we work across five countries in Africa to support the most vulnerable children, such as street-connected children, children with disabilities, children affected by conflict and children behind bars.
