

Empower a young woman

Uganda

D. R. Congo

Counselling, vocational training and support to set up a business

Decades of deadly conflict in eastern D.R.Congo have thrown the region into chaos and poverty. Young women have few opportunities and 40% of children don't go to school. Many are forced onto the streets and have to steal food to survive. Robbery, petty crimes and sexual violence become normal...

Through counselling, to help her manage past trauma, vocational training, in a skill such tailoring or hairdressing, and by providing everything she needs to get her business off the ground, this gift can change a young woman's life!

Chance for Childhood

At Chance for Childhood we believe that no child should be forgotten! That's why we work across five countries in Africa to support the most vulnerable children, such as street-connected children, children with disabilities, children affected by conflict and children behind bars.
