

Entrepreneurial Training

Uganda

Ghana

An entrepreneurial training course and ongoing support

With widespread poverty and unemployment in northern Uganda, young people have no means to improve their prospects. Our five day entrepreneurial training course covers business plans, budgeting, customer care and more.

It gives young people the skills they need to access the job market or set up their own business! This means they can earn a stable income and escape a life of poverty.

Chance for Childhood

At Chance for Childhood we believe that no child should be forgotten! That's why we work across five countries in Africa to support the most vulnerable children, such as street-connected children, children with disabilities, children affected by conflict and children behind bars.
